RE: Meter Upgrade

The North Little Rock Electric Department has successfully negotiated a change order to our ongoing contract with our meter providers, Sensus and HD Supply. The change order will allow us to update our meter inventory with new technology that will improve reliability, accuracy and safety.

Procedurally, our existing meter fleet will be removed, updated, and replaced. We will use an improved installation and quality control process. The work will be time-consuming, but worthwhile. The change order will not require any additional appropriation or substantial modification to our existing contract. The upgrade is anticipated to be complete in about one year.
